# Naveen Kumar

Product Marketing Manager @ Zoho | GTM Strategy | Positioning & Messaging | AI-Native Marketing | Building Reochart & SwitchQR  
Chennai, Tamil Nadu, India

## Summary

I build products, tell their stories, and help them find the right market. Over the past 10 years at Zoho, I've led product marketing for Zoho Projects, shaping go-to-market strategy, positioning, launches, and sales enablement across North America, Europe, MENA, APAC, and ANZ. My work spans the entire product lifecycle, from bringing new products to market to equipping sales teams with messaging they can confidently use in customer conversations. What I care most about is taking a complex product and turning it into a story that people understand, believe, and buy into. That starts with getting close to customers and understanding not just what they do, but why it matters to them. Outside of Zoho, I'm building AI-native SaaS products, Reochart and SwitchQR. Building products has made me a better product marketer. It's one thing to write positioning. It's another to watch a new user struggle, realize the messaging missed the mark, and iterate until it clicks. That feedback loop has fundamentally changed how I think about product marketing and go-to-market strategy. I'm particularly interested in how AI is changing the way products are built, marketed, and adopted. I use AI every day to accelerate research, competitive analysis, messaging, content creation, and GTM execution. More importantly, I see AI as a way for small teams to build and move faster than ever before. If you're building products that solve meaningful problems, I'd be happy to hear about them.

---

## Experience

### Zoho Corporation

Product Marketing Manager

December 2016 - Present (9 years 8 months)

Drive product marketing for Zoho Projects, shaping go-to-market strategy, positioning, product launches, and sales enablement across North America, Europe, MENA, APAC, and ANZ. My work spans the product lifecycle, from

bringing new capabilities to market to ensuring sales teams have the right messaging for customer conversations.

Built a customer advocacy program that produced more than 75 case studies and testimonials across global markets, providing sales teams with relevant customer proof points across industries, use cases, and buyer segments.

Planned and delivered more than 30 customer-facing events, including webinars, roadshows, workshops, and user groups across multiple international markets, supporting customer education, product adoption, and pipeline generation.

Established customer feedback programs that more than doubled customer satisfaction scores while strengthening the voice of the customer across Product, Marketing, and Support.

Managed Zoho Projects' strategic partnership with the Project Management Institute (PMI), collaborating with PMI's US, Europe, Africa, and 10+ local chapters to expand engagement within the global project management community.

Developed positioning, messaging, and launch assets for new features, pricing initiatives, and platform releases, including Zoho Projects Plus, enabling global sales teams with battle cards, competitive messaging, presentations, and customer-facing collateral.

Use AI daily across customer research, competitive analysis, messaging, content creation, and go-to-market planning to accelerate execution and improve the quality and consistency of marketing output.

## Cognizant

### Associate

August 2015 - December 2016 (1 year 5 months)

India

Worked as a software engineer, collaborating with cross-functional teams to deliver enterprise applications. The experience gave me a strong technical foundation and an understanding of the software development lifecycle, which continues to help me bridge the gap between Product, Engineering, and Marketing.
